

**Mathematics MAT 112 : Basic Statistics**  
**Spring 2010**  
**MWF 8:30 a.m. - 9:20 a.m., Hubbard 207**  
**MWF 9:30 a.m. - 10:20 a.m., Hubbard 207**

**Instructor:** Dr. Brad Emmons  
**Office:** 209 Faculty Center  
**Telephone:** 792-3413 (Don't leave voicemail!)  
**Office Hours:** MF 10:30 - 11:30, or by appointment  
**Email:** bemmons@utica.edu  
**Homepage:** [http://www.utica.edu/faculty\\_staff/bemmons](http://www.utica.edu/faculty_staff/bemmons)

### **Course Materials**

Introductory Statistics, Sixth Edition, Prem S. Mann (required)  
A four-function calculator (required)

### **Introduction**

Statistics is the branch of mathematics devoted to the study of collecting, organizing and interpreting data. Increasingly it is recognized that any educated person, regardless of the field of study, shall be acquainted with statistical reasoning. It is a goal of this class to make you more familiar with how statistical reasoning plays a roll in our lives. We will be studying both descriptive and inferential statistics throughout the course. We will find out how to organize data in a meaningful way, and how to make decisions based on data.

### **Exams**

There will be two in-class exams as well as a final cumulative exam. The exams will test your understanding of statistical concepts, your ability to work through some of the computations, as well as your ability to apply the techniques to certain applications. The first exam is scheduled for Friday, February 19, the second exam is scheduled for Friday, April 2. The final exam will be held on Saturday, May 8 from 8:00 - 10:30 a.m. for section A, and on Tuesday, May 11 from 1:00 - 3:30 p.m. for section B. All exams will count for 25 percent of your final grade. There will be NO make-ups for missed exams. Please look over your schedule as soon as possible. If you see a potential conflict, inform me immediately.

### **Homework**

The best way to learn Mathematics is to solve problems. I will be offering suggested problems to look at for the next class, but these problems will not be turned in for a grade. The homework problems will range in difficulty and include both computational problems as well as conceptual problems. The purpose of this is to help you identify where you might have difficulties. If you encounter any trouble with an assignment or a concept, seek help!

### **Quizzes**

Every other Friday, starting with January 29th, we will have an in-class quiz. There will be a total of 6 quizzes throughout the semester. You should treat the quizzes as mini-exams, covering material from approximately 6 days worth of course work. The quizzes will consists of 4 or 5 problems similar to problems from your graded homework, and they are to make sure that you are keeping up with the concepts presented in class, and to identify where you are having problems before you take the exams. The quizzes will count for 25% of your final grade.

### **Attendance**

Attendance in MAT 112 is extremely important. There is no official attendance policy for my courses. Although I *highly recommend* that you make an effort to be in class each day, on time, and willing to learn. If you are late to class, you may stay to enjoy the wonderful learning experience. But please be respectful of the rest of the class and join us quietly.

## Grading

Your grade in this course will be based on three main factors: homework, quizzes and exams. The quizzes will be worth 25% of your final grade, and the exams 75%. In addition to these factors, minor ethereal factors such attendance, class participation, attitude, and improvement over the course of the semester can also affect your grade. To determine your final grade, 90–100% = A, 80–89% = B, 70–79% = C, 60–69% = D, 59 and below = F, with the top two percents receiving a + and the bottom two percents receiving a –.

## Calculators

Because we will be dealing with a reasonable amount of data in this course, the use of calculators will be allowed on homework, quizzes, and exams. However, the only type of calculator that you can use during the exams are the basic four-function calculators. That is, programmable calculators or cell phone calculators will not be allowed.

## Important Dates

Friday, January 29 – Quiz I  
Friday, February 12 – Quiz II  
Friday, February 19 – Exam I  
Friday, March 5 – Quiz III  
Monday, March 15 - Friday, March 19 – Spring Break  
Friday, March 26 – Quiz IV  
Friday, April 2 – Exam II  
Friday, April 16 – Quiz V  
Friday, April 30 – Quiz VI  
Wednesday, May 5 – Last Day of Classes  
Saturday, May 8, 8:00 - 10:30 – Final Exam, Section A  
Tuesday, May 11, 1:00 - 3:30 – Final Exam, Section B

## Suggestions

Come to class with your homework assignment completed every day  
Study for at least 30 minutes each day in addition to completing your homework assignment  
Read the section we will be covering in class *before* arriving to class  
Do not fall behind!  
Come to office hours to discuss concepts. I am here to help!

## Syllabus

MAT 112 : Basic Statistics

Spring 2010

Week 1	January 22	Course Policies, Syllabus, Basic Terms
Week 2	January 25	Section 1.8 – Summation Notation
	January 27	Section 2.2 – Qualitative Data
	January 29	Section 2.3, 2.4 – Quantitative Data , <b>Quiz I</b>
Week 3	February 1	Section 3.1 – Measures of Central Tendency
	February 3	Section 3.2 – Measures of Dispersion
	February 5	Section 3.3 – Mean, Variance for Grouped Data
Week 4	February 8	Section 3.4 – Standard Deviation
	February 10	Section 4.1 – Experiments, Outcomes, and Sample Space
	February 12	Section 4.2 – Calculating Probability, <b>Quiz II</b>
Week 5	February 15	Section 4.3, 4.4 – Marginal and Conditional Probability
	February 17	Review
	February 19	<b>Exam I</b>
Week 6	February 22	Sections 4.5 - 4.7 – Types of Events
	February 24	Sections 4.8, 4.9 – Intersections and Unions
	February 26	Sections 5.2 – Probability Distribution of a DRV
Week 7	March 1	Sections 5.3, 5.4 – Mean and Standard Deviation of a DRV
	March 3	Section 5.5 – Factorials and Combinations
	March 5	Section 5.6 – Binomial Distribution, <b>Quiz III</b>
Week 8	March 8	Section 5.7 – Hypergeometric Distribution
	March 10	Section 5.7 – Hypergeometric Distribution
	March 12	Sections 6.1 - 6.3 – The Normal Distribution
Week 9	March 15	NO CLASS
	March 17	NO CLASS
	March 19	NO CLASS
Week 10	March 22	Section 6.4 – Standardizing a Normal Distribution
	March 24	Section 6.4 – Standardizing a Normal Distribution
	March 26	Section 6.6 – Determining $z$ and $x$ Values, <b>Quiz IV</b>
Week 11	March 29	Sections 7.1, 7.2 – Population and Sampling Distributions
	March 31	Review
	April 2	<b>Exam II</b>
Week 12	April 5	Sections 7.3, 7.4 – The Sampling Distribution of $\bar{x}$
	April 7	Section 7.5 – Applications of the Sampling Distribution of $\bar{x}$
	April 9	Sections 7.6, 7.7 – The Sampling Distribution of $\hat{p}$
Week 13	April 12	Section 7.8 – Applications of the Sampling Distribution of $\hat{p}$
	April 14	Section 8.3 – Est. of $\mu$ : $\sigma$ known
	April 16	Section 8.3 – Est. of $\mu$ : $\sigma$ known, <b>Quiz V</b>
Week 14	April 19	Section 8.5 – Est. of $p$ : Large Samples
	April 21	Sections 8.6 - 8.7 – Determining Sample Size for Estimation of Proportion
	April 23	Section 9.1 – Hypothesis Testing : Introduction
Week 15	April 26	Section 9.2 – Hyp. Tests about $\mu$ : $\sigma$ known
	April 28	Section 9.3 – Hyp. Tests about $\mu$ : $\sigma$ unknown
	April 30	Section 9.4 – Hyp. Tests About $p$ : Large Samples, <b>Quiz VI</b>
Week 16	May 3	Review
	May 5	Review
