Core Goal 5
Computer Use
Student Learning Outcomes Assessment

Core Student Learning Outcomes:
- Student will present and share information effectively through the use of a self-designed webpage.
- Student will design tables, add data, and use queries and reports to extract and organize that data using a database program.
- Student will use targeted searching techniques and a variety of tools to gather information on various topics from the Internet.

Student ID:		Student Name:	
Course: CSC 118 section		Semester: Spring 2017	
	Deficient (0-59%)	Acceptable (60-89%)	Superior (90-100%)
Student has presented and shared information effectively through the use of a self-designed webpage			
Student has designed tables, added data, and used queries and reports to extract and organize that data using a database program			
Student has used targeted searching techniques and a variety of tools to gather information on various topics from the Internet
