I. Definition of Institutional Effectiveness

Institutional effectiveness refers to how well an institution is achieving its mission and goals. An effective institution is characterized by a clearly defined mission that articulates who it serves, what it aspires to be, and what it values. Likewise, an effective institution has clear goals that are broadly communicated to its stakeholders.

Institutional effectiveness means engaging in ongoing and systematic assessment of programs and services with the goal of continuous institutional improvement. Since student learning is at the heart of an educational mission, meaningful assessment of student learning across the campus is fundamental to institutional effectiveness.

An institution demonstrates its effectiveness when it shows that planning and decision-making are evidence-based and mission focused. In higher education’s current landscape, institutional effectiveness also links to compliance with federal and state regulations and accreditation requirements.

II. Assessment

A. Purpose
Assessment is not an end unto itself. It is a means to an end, intended to gather evidence that informs continuous improvement at all levels of an institution. Effective assessment processes include the regular and systematic collection of reliable evidence that has implications for planning decisions and resource allocations.

B. Guiding Principles
Assessment processes at Utica College are guided by best practices, research and scholarship, and accreditation requirements. The following are the guiding principles of assessment at UC:

- **Assessment is relevant.** It is linked to the College’s educational mission and strategic and operational goals.
- **Assessment is useful.** Assessment results are used to inform planning and budgeting decisions at both the institutional and unit level. Assessment findings are further used to improve processes, procedures, policies, and services.
- **Assessment is realistic and sustainable.** Assessments efforts should be reasonable in terms of the resources available and expectations for providing useful results. If relevant, assessment processes should capitalize on existing information sources, such as Institutional Research surveys, clinical or student teaching evaluations, and licensing or certification examinations.
- **Assessment is non-punitive.** Assessment is a process used to identify where practices are strong and where they should be changed or improved. Effective assessment
depends on reliable results and honest reflection, neither of which should be used in a punitive manner.

- **Assessment is comprehensive.** Meaningful results are derived from using multiple valid methods: direct and indirect, qualitative and quantitative, formative and summative.
- **Assessment is well documented.** Assessment findings should be documented in the College’s assessment management system, TaskStream, on a periodic basis, as outlined in this institutional effectiveness guide. All departments, programs, and services are obliged to systematically collect evidence that shows how well they are achieving their individual mission and goals.

C. Glossary of Terms

A glossary of assessment terminology used by Utica College may be found on pages 9-11 of this guide and on the “Assessment at Utica College” website.

III. Assessment Processes

A. Institutional

Each division is expected to have clearly articulated and measureable annual goals that are congruent with the College’s mission, institutional priorities, and strategic initiatives. Likewise, each division should identify the targets or benchmarks that define success. Where appropriate, the respective standards of each unit’s professional association should inform the targets or benchmarks.

Progress toward divisional goals is assessed semi-annually in connection with the President’s Planning Retreats and results shared with members of the Joint Cabinet. In instances where funding was specifically allocated to support a particular initiative, the responsible beneficiary provides a status report via Google forms reports on how the funds were used and whether or not the intended outcome was achieved.

*All reports should focus on significant findings related to institutional priorities and strategic divisional goals. They should not be a checklist of action items.* Significant findings from department-level assessments that align with institutional priorities should also be shared at retreats to ensure departmental participation in institutional planning. In addition to assessment results, critical information such as demographic patterns, governmental regulations, and economic or labor forecasts may be used to inform planning decisions.

Planning processes should be well-documented in minutes from each retreat, and decisions shared with UC stakeholders at town hall meetings, on the College’s website, and in various other publications and communications.

This process may be amended once the College launches a new strategic plan.

B. Academic Departments, Co-Curricular Units, and Student Learning

All academic programs and departments, including Core, are expected to assess student
learning and operational goals on an annual basis. Plans and results should be updated in the College’s assessment management system, TaskStream, by August 15 of each year. Reports will be reviewed on a cyclical basis by the Academic Assessment Coordinating Committee, and feedback shared directly with departmental faculty in face-to-face meetings and by scored rubric.

Chairpersons are expected to meet with their respective school dean in September of each academic year to review any significant assessment findings, discuss concerns or issues related to assessment efforts, and communicate resource needs documented by assessment findings. When appropriate, deans will advocate for academic departments in their school.

The Oversight Committee for Core (OCC), chaired by the Director of Core, administers the student learning assessments for the Core program. Core Leadership Groups, comprised of teaching members of the faculty, plan and conduct the assessments and review the results. The director reports directly to the Provost.

Academic programs and departments are likewise required to complete a 5-year program review. Policies, processes, and procedures related to the 5-year program review may be found in the Academic Assessment Coordinating Committee’s Handbook. Requirements are also outlined on the “Assessment at Utica College” site.

The College, recognizing and valuing the learning that students gain while outside the classroom, maintains that the “co-curriculum is an exceptionally important part of a student’s college experience”: http://www.utica.edu/student/cocurriculargoals.cfm. As such, co-curricular and support units in Academic Affairs, Student Affairs, and Athletics are required to identify student learning goals and systematically assess these goals. Specifically, the following operations are responsible for assessing student learning in addition to operational effectiveness: Athletics, Athletic Student Success, Student Living and College Engagement, the Counseling Center, Career and Professional Development, Student Conduct and Community Standards, Learning Services, Student Success, New Students and First-Year Programs, Tutoring, Opportunity Programs, Health Services, International Education, Library and Learning Commons, and Admissions.

Assessment plans and results should updated in TaskStream by June 30. Reports will be reviewed by the Co-Curricular Assessment Committee.

Indirect assessments of student learning and institutional effectiveness are additionally conducted by the Office of Institutional Research. Such measures include the National Survey of Student Engagement (NSSE), the Noel-Levitz Student Satisfaction Inventory (SSI), and the Student Opinion of Teaching survey. The NSSE and SSI results may be found at https://www.utica.edu/ir/studentsurveys.cfm. Departments are urged to use the findings relevant to their operational and learning goals.
C. Non-Academic Administrative Units
Administrative departments should have clearly articulated operational goals and clearly identified assessment methods. Where appropriate, targets or benchmarks should be informed by the respective standards of each unit’s professional association. Goals must be congruent with the appropriate divisional goals and institutional priorities. Likewise, individual performance goals should align to the department’s goals.

Departmental goals (and student learning goals, if required by the unit) should be assessed on an annual basis. Plans and results need to be updated in the College’s assessment management system, TaskStream, by June 30 of each year.

Annual assessment reports that are not reviewed by the Co-Curricular Assessment Committee will be reviewed by the Institutional Effectiveness Committee.

Non-academic administrative departments are further required to complete a 5-year program review. The program review schedule is established by the Institutional Effectiveness Committee. Processes and procedures related to the 5-year review may be found in the Guide to Annual Assessment and Program Review: Co-Curricular and Non-Academic Departments.

D. Annual Performance Review
Employee performance is assessed annually via the performance review. This formative assessment allows supervisors to give specific feedback to their direct reports regarding work performance, skills and abilities, and commitment to institutional mission and goals.

The annual performance review requires each employee to report on progress related to goals from the previous academic year. If the goals are the same as or similar to the department’s goals (i.e. they are not goals for personal performance or professional development), the employee may reference or provide a link to the departmental assessment report.

The annual performance review likewise requires employees and/or their supervisors to articulate goals for the upcoming academic year. Goals that are not personal in nature should align with the departmental goals.
## IV. Assessment Timeline

In order to facilitate assessment with planning and resource allocations, the College adheres to the following timeline:

<table>
<thead>
<tr>
<th>Date</th>
<th>Event</th>
<th>Responsible Parties</th>
</tr>
</thead>
<tbody>
<tr>
<td>May/June</td>
<td>President’s Planning Retreat with the Joint Cabinet:</td>
<td>Department and division heads; Members of the Joint Cabinet; Faculty; President; Financial Affairs; Board of Trustees; Co-Curricular Assessment Committee</td>
</tr>
<tr>
<td></td>
<td>• Final report on institutional goals &amp; priorities from fiscal year</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Finalize targets &amp; benchmarks for next fiscal year</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Academic Departments and Divisional Retreats</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Review assessment findings from academic year</td>
<td></td>
</tr>
<tr>
<td>May/June</td>
<td>Administrative Departments</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Assessment results and plans from co-curricular units and administrative departments completed and updated in TaskStream and submitted to respective vice president</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Co-Curricular Assessment Committee reviews annual assessment reports and plans from the co-curricular units</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Individual performance goals established</td>
<td></td>

</tbody>
</table>

V. Committee Structures and Review Processes

A. Institutional Effectiveness Committee (IEC)

The Institutional Effectiveness Committee reviews the institution’s assessment processes with specific attention to how effectively units are achieving the College’s mission and goals and how results from the assessment of institutional goals and priorities inform planning and resource allocations. The IEC also facilitates the process by which specific operations, units, or persons report progress on institutional initiatives that have received additional funding. The IEC is additionally responsible for maintaining and monitoring the MSCHE document roadmap and for charting progress on recommendations made during the self-study process. Finally, this committee is responsible for the periodic assessment of institutional assessment processes.

The IEC reports semi-annually to the College President and, at the President’s request, may report to the Board of Trustees.

Members: Standing members include the the Dean for Academic Assessment and the Associate VP for IT and Institutional Research. Seven additional members serve on a 3-year cycle: 4 from the full-time faculty (one representing each school and one representing online offerings); 1 from a co-curricular unit and 1 from athletics; and 1 member from either advancement/alumni or career services.

B. Academic Assessment Coordinating Committee (AACC)

The Academic Assessment Coordinating Committee is a collegial body that coordinates and assesses the assessment processes for the Division of Academic Affairs. Specifically, the committee reviews annual goal reports and assessment plans from academic departments and facilitates 5-year reviews. The AACC reports semiannually to the Provost and Faculty Senate regarding the state of assessment at Utica College.

Members: Chaired by the Dean for Academic Assessment, the Academic Assessment Coordinating Committee is comprised of 3 faculty members from each school (for a total of 9 faculty) and 1 representative from the College library. The Provost serves as an Ex Officio member.

C. Co-Curricular Assessment (Co-CAC)

The Co-Curricular Assessment Committee is a consultive body responsible for guiding and reviewing the assessment processes in co-curricular areas. These areas include units housed under Academic Affairs, Student Affairs, Enrollment, and Athletics.
The Co-CAC reports annually to the Dean of Assessment.  

*Members:* Chaired by the Dean of Students, the Co-CAC’s membership consists of 2 representatives from Student Affairs, 1 from Student Success, and 1 from Athletics. The Dean of Assessment serves as an *Ex Officio* member.  

**VI. Committee Reports**

Each committee charged with assessment responsibilities is required to submit a report that includes the status of assessment processes, a summary of findings, and evidence of compliance with MSCHE accreditation standards. The outline for these reports may be found on page 12 of this guide.  

**V. Institutional Resources**

Utica College systematically collects information related to its effectiveness in achieving its mission, goals, and institutional priorities as well as its compliance with accreditation standards and governmental regulations. The following table identifies the most common information sources at the College. The Associate VP for IT and Institutional Research also compiles a survey calendar.  

<table>
<thead>

GLOSSARY OF TERMS ASSOCIATED WITH ASSESSMENT

Academic Program – According to NYS Education Department, an academic program is organized around the set of educational requirements necessary to qualify for a registered degree. The curriculum or program includes general education or specialized study in depth in a particular field, or both (NYSED, 2012).

Artifacts – The work produced by students while engaged in a learning experience.

Analysis of Findings – Examination of the data gathered during the assessment cycle, including reflective consideration about what actions, if any, should be taken.

Action Plans – Actions taken to improve the program or assessment process based on the analysis of results; “Closing the loop.”

Assessment – Measures the degree to which goals have been met; provides specific evidence of strengths and areas needing improvement.

Assessment Method – Indicates how an assessment was conducted. Examples include surveys, tracking, focus groups, performance evaluations, rubrics. Also referred to as assessment measure.

Assessment Process – The systematic collection, review, and use of information about student learning, educational programs, student support programs, and college services undertaken to improve teaching/learning and institutional effectiveness.

Assessment Plan – A document which outlines how and when selected outcomes will be assessed.

Assessment Report – An annual document based on the Assessment Plan that presents and explains assessment results and shows how assessment results are being used to improve the program.

Benchmark – A standard or point of reference against which things may be compared or assessed.

Closing the loop – The term used to signify the next step or ongoing steps in the assessment cycle. Also referred to as action plan.

Co-curricular Units – The areas outside the classroom where the College also achieves its educational mission.

Course-embedded Assessments – Direct methods to assess student-learning that are well integrated into and organic to the educational experience.

Course Student Learning Goals (CSLG) – the measurable learning/knowledge/skill expectations for all students completing an academic course, documented in the syllabi and program review
documents. Direct measures are to be used; indirect measures/results will be used to support
the direct measure findings. CSGL are identified by faculty, described in the course syllabus, and
it is the faculty of each course who determine what to measure and the tool to use for this
faculty-driven process.

**Course Operational Goals** – focus on the functioning of the course, rather than the learning
achieved by the students. Examples include development of new courses, deletion of a course,
mods to a course, and course mapping to program goals.

**Course Syllabus** – A document that lays out the expectations, including the learning goals, for a
single course.

**Curriculum Map** – A matrix representing a program's learning goals and indicating where they
are developed in a program and to what extent.

**Direct Methods of Assessment** – Measures used to document student performance. Examples
of direct measures include rubrics for capstone projects, portfolios, papers, and performances.

**Document Roadmap** – Published by the Middle States Commission on Higher Education, the
document roadmap is a tool where institutions might align specific sources of evidence with
accreditation standards. The document roadmap is useful in demonstrating institutional
compliance and identifying areas where the institution might need to improve.

**5-Year Program Review** – Required of academic departments, the 5-year program review is a
self-study completed within a 5-year review cycle. The self-study requires departments to
examine curriculum, student learning, faculty expertise, enrollment in the major(s) and
minor(s), and other areas of relevance to the institution.

**Findings** – Results (evidence, data and/or information) gathered from assessment.

**Formative Assessments** – Assessments that occur throughout the learning process that aim to
understand and, therefore, improve learning.

**Institutional Effectiveness** – Institutional effectiveness refers to how well an institution is
achieving its mission and goals. An effective institution is characterized by a clearly defined
mission that articulates who it serves, what it aspires to be, and what it values. Likewise, an
effective institution has clear goals that are broadly communicated to its stakeholders.

**Indirect Methods** – Measures used to assess students' perceptions of their learning and
educational experiences. Examples of indirect measures include surveys, focus groups, and
interviews.

**Institutional Priorities** – In consultation with the Board of Trustees the college President
identifies the College’s institutional priorities for the year. All goals are linked directly to the
College’s Strategic Plan and are executed at the Divisional level. Independent divisional goals
may also sometimes inform and direct new strategic initiatives or institutional goals through
the established strategic planning processes.

**Institutional Student Learning Goals** – The measurable student learning goals that are realized
in the complete educational experience, both curricular and co-curricular. At Utica College, the
key intellectual skills are the institutional learning goals.

**Key Performance Indicators (KPIs)** – Measureable values that indicate the extent to which the
institution is achieving its mission and goals.

**Metrics** – Standards of measurement used to assess efficiency, performance, progress, or
quality.

**Mission Statement** – A concise statement outlining the purpose of a program, who it serves,
and what distinguishes it.

**Program Student Learning Goals (PSLG)** – the measurable learning/knowledge/skill
expectations for all students graduating from a particular curriculum/major or students being
served by a particular unit.

**Program Operational Goals** – Goals set for and by a program, usually during the 5-year
program review process. However operational goals may be set during a review for an external
accreditor or in the interim between program reviews. Operational goals address the
functioning of the program.

**Program Review** – Required self-study process completed by each academic program. It is
usually conducted on a five-year rotation, unless external program accreditation cycles require
a different review time line.

**Rubric** – Specific sets of criteria that clearly define for both student and teacher what a range of
acceptable and unacceptable performance looks like. Criteria define descriptors of ability at
each level of performance and assign values to each level.

**Target** – A value that indicates whether or not a goal has been achieved.

**TaskStream** – The software package used to document assessment results and manage
assessment processes.

**Validity** – The extent to which an assessment measures what it is supposed to measure and the
extent to which inferences and actions made on the basis of test scores are appropriate and
accurate.

**Value added** – Evidence that shows the effects educational providers have had on students
during their programs of study beyond what would have occurred through natural maturation.
A comparison of the knowledge and skills students bring to the educational process with the
knowledge and skills they demonstrate upon completion of the educational process.
Report Template from Assessment Committees

I. Membership

Identify the members of the committee. If there have been changes to the membership or if changes are anticipated (i.e. some members’ terms are expiring), please describe them here as well.

II. Meetings

Indicate how often the committee met during the academic year. Reference where agendas and minutes are filed and if they are accessible to anyone outside the committee.

III. 20XX-20XX Assessment Cycle

- **Participation**
  Indicate how many units completed an assessment report. Identify those departments that did not complete an assessment and the reasons for non-compliance. What actions, if any, will be taken to move towards 100% compliance?

- **Assessment of Process**
  Analyze the results of the rubric used to assess each department’s process. Where is the process effective? What areas might require additional work or professional development?

- **Summary of Assessment Methods and Findings**
  Report on the overall statistics for the departments generated in TaskStream. Are there any issues or concerns regarding these data?

- **Using Assessment Results**
  Summarize how departments are using assessment results to make improvements or inform planning. The results may be related to student learning or operational goals.

IV. Relevant Criteria Related to MSCHE Standards

Indicate the evidence that aligns with specific criteria related to accreditation standards. (Most of the evidence will be housed in TaskStream and in annual reports, but there may be other sources as well.)

V. Action Plan

What action plan or goals does the committee have for the following academic year to strengthen assessment processes and facilitate effective assessment?
### INSTITUTIONAL EFFECTIVENESS RUBRIC
(adapted from the SUNY Council on Assessment rubric to measure institutional effectiveness)

<table>
<thead>
<tr>
<th>Element</th>
<th>Outcome</th>
<th>Exemplary</th>
<th>Established</th>
<th>Developing</th>
<th>No Evidence</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Plan</strong></td>
<td>The institution has a formal assessment plan that documents an organized, sustained assessment process covering all major administrative departments, student support services, and academic programs.</td>
<td>A written plan specifies responsibility for conducting assessment at departmental and institutional levels. The plan further indicates timelines and procedures and notes how assessment findings are channeled into strategic planning and budgeting.</td>
<td>All functional areas conduct assessment systematically and may have written policies to guide the process. However, there is no institutional plan that serves to coordinate how assessment findings improve institutional effectiveness.</td>
<td>Some, but not all, functional areas conduct assessment systematically, and these areas have policies and procedures for their assessment processes. However, there is no coordination of or standards for assessment set by the institution.</td>
<td>No institutional plan for assessment. Assessment may be conducted at the institution, but on an <em>ad hoc</em> basis, usually in response to specific challenges or accreditation mandates.</td>
</tr>
<tr>
<td><strong>Goals</strong></td>
<td>Measureable goals have been articulated for the institution and within functional areas, including courses, programs, departments and nonacademic units.</td>
<td>All departments at the institution and the institution itself have clearly articulated, measurable goals. Expected or aspirational outcomes are inherent in the goals.</td>
<td>All departments have goals, but not all are clearly stated, and the desired outcomes may lack clarity</td>
<td>Some but not all departments have clearly stated goals and/or goals are more of an operational checklist, a “to do” list.</td>
<td>Neither the institution nor its departments has clearly stated, measurable goals that identify expected or aspirational outcomes.</td>
</tr>
<tr>
<td><strong>Alignment/Mapping</strong></td>
<td>Specific goals (e.g. course-level, department-level) are mapped to broader, “higher-level” goals (e.g. Key Intellectual Skills, strategic goals) and the institutional mission.</td>
<td>Departments indicate how their goals and outcomes map to the institution’s mission and goals. When appropriate, they are also linked to accreditation standards.</td>
<td>Departments map their goals to the institutional mission and goals, but some of the linking seems arbitrary or too much of a stretch. Likewise with mapping to accreditation standards.</td>
<td>Not all departments have mapped their goals to the institution’s mission and goals or current accreditation standards.</td>
<td>There is no evidence of alignment between departmental missions and goals and the mission and goals of the institution.</td>
</tr>
</tbody>
</table>
### Culture

All appropriate members of the individual department are involved in assessment activities.

All members of the College are knowledgeable about assessment activities. Each department involves key stakeholders in its assessment processes, and the College’s leadership team frequently articulate the importance of assessment and its contribution to continuous improvement and decision-making.

Some departments involve faculty or staff in some aspect of assessment—e.g. planning and collecting data, reviewing assessment results, implementing program-level improvements based on assessment findings.

In most departments, assessment is done by lone individuals charged with assessment responsibilities (usually a director or department chair).

### Methods & Findings

Assessment results are gathered from multiple sources and measures.

Assessment is based on multiple measures of performance, including direct and indirect and qualitative and quantitative data.

The institution and its departments use a combination of direct and indirect measures to assess goals.

The institution and its departments rely primarily on indirect measures. Assessment tools are poorly defined, not appropriate to the goal, or poorly constructed.

Not clear how institutional or departmental goals are being assessed. Because the goals are more of a checklist or action steps, they cannot be properly measured by any assessment method.

### Sustainability

Assessment is ongoing, systematic, and conducted in a manner that is sustainable over the long term.

Assessment is routinely conducted in all appropriate departments. The sustainability of assessment processes is evident by the fact that they are regular, ongoing, and systematic. Assessment continues despite turnover in departments.

Assessment is routinely conducted in most but not all appropriate departments. The sustainability of assessment processes varies with respect to how regularly it occurs or how systematically goals are measured. Efforts have sometimes been thwarted by staff turnover.

The institution can document that sustainable assessment activity is regularly occurring in several departments at the College (notably, academic departments), but practices are not universal or sustainable for the long term.

There is no evidence of sustainable assessment activity occurring within any functional department at the College (academic, student services/support, athletics, and administrative offices).

### Communication

Results are easily accessible. They are communicated to all appropriate audiences at appropriate times.

Assessment results are disseminated to appropriate audiences at appropriate times. Departments within the College share assessment findings with one another or with external stakeholders.

Assessment results are owned by the specific department and shared with appropriate stakeholders.

Assessment results, if they exist, reside within the individual department and are shared with appropriate stakeholders.
<table>
<thead>
<tr>
<th>Planning &amp; Resources</th>
<th>Assessment findings are routinely considered in planning and budgeting processes.</th>
<th>The institution is able to demonstrate that planning and budgeting processes have routinely used assessment data in decision-making.</th>
<th>Assessment findings are used in planning and budgeting, but there is no clear mechanism in place to ensure this is routinely accomplished.</th>
<th>Assessment findings from only a few departments are used to inform planning and budgeting processes. Institutional planning and budgeting decisions are based something other than assessment findings.</th>
<th>Assessment findings remain within the department where they were collected. It is not clear how planning or budgeting decisions are made.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Using Assessment Results</td>
<td>Assessment findings are used to inform continuous improvement.</td>
<td>The institution is committed to using assessment to inform improvement; there is documented evidence that assessment results, especially those related to student learning, are routinely used for institutional improvement.</td>
<td>There is evidence that all departments regularly use assessment results to inform improvements within their own operations.</td>
<td>There is some evidence that assessment results are used occasionally to inform institutional improvement or departmental effectiveness.</td>
<td>Assessment continues to be done for compliance purposes; there is little evidence that results are used to inform institutional improvement or departmental effectiveness.</td>
</tr>
</tbody>
</table>
